HAI '26 · 14TH INT'L CONFERENCE ON HUMAN-AGENT INTERACTION · OSAKA, NOV 16–19, 2026 WORK IN PROGRESS ▶ 1-MIN DEMO · QR BELOW

Delegating Design Critique to AI While Preserving Human Decision Authority

An AI Design Director for a Small Apparel Brand

Koji Okazaki · Koji Yamanaka · Ryosuke Amada · Akira Okamoto · Miyabi Kuwabara · Koji Kabuto · Kensho Iwashita
Information Architecture Course, Advanced Institute of Industrial Technology (AIIT), Tokyo, Japan

The AI critiques — with reasons
Criteria, strengths, concerns, options

No scores. No verdicts.
Uncertainty is stated, not hidden

Humans decide
Adopt · modify · defer · reject

Disagreement becomes knowledge
Logged, then fed back into brand criteria

01 TODAY · FIELD SITE: A SMALL JAPANESE BAG DESIGN COMPANY

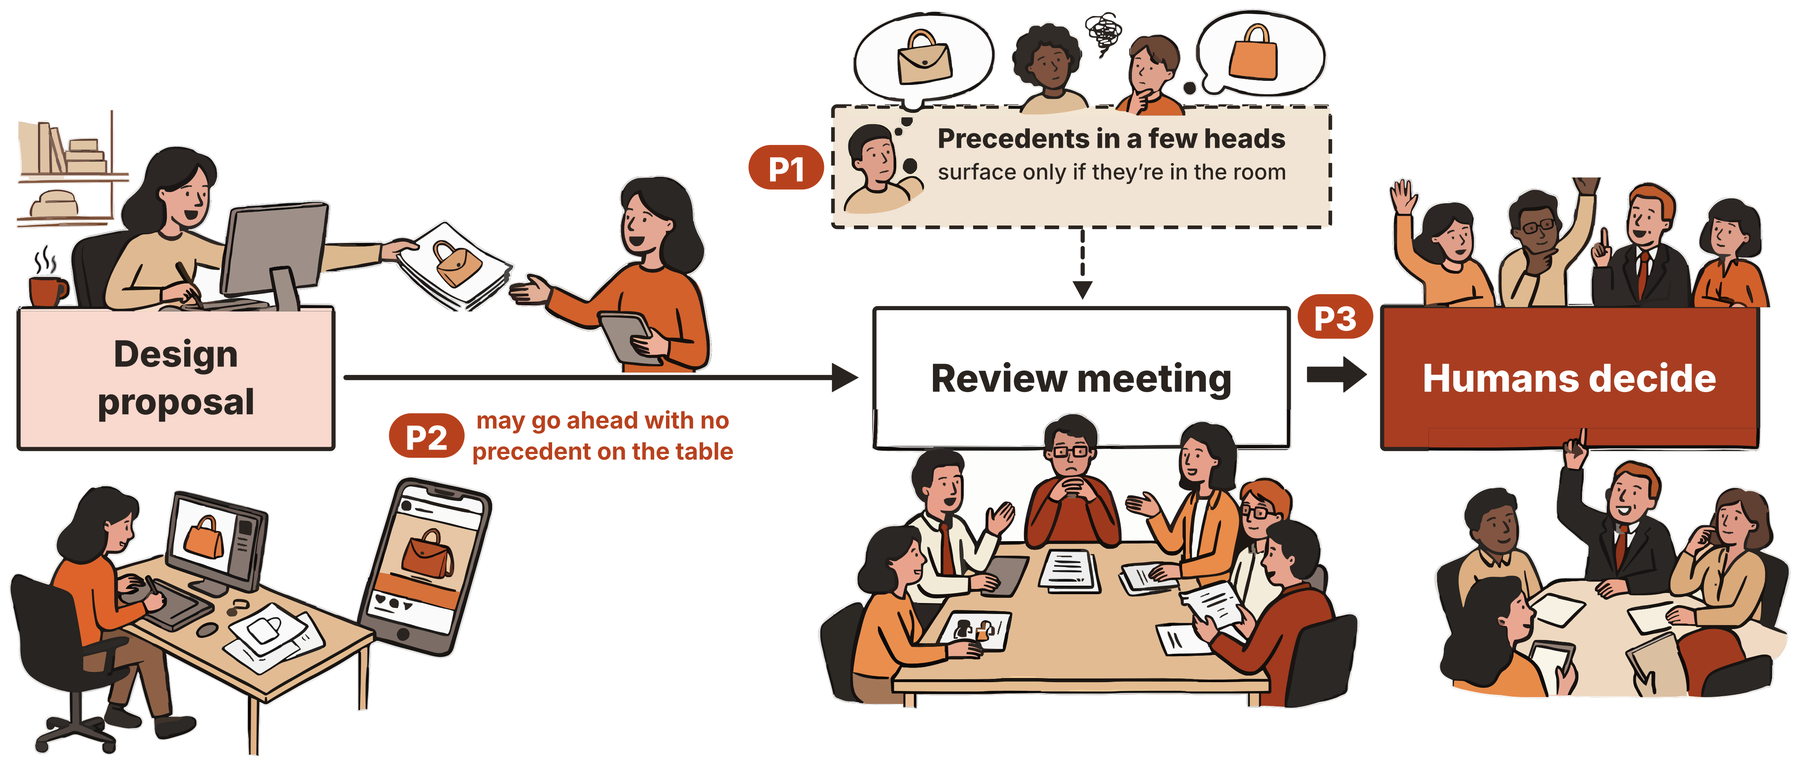

"We rejected this idea before" — only if someone remembers

AI can now critique product images. **What should we delegate — and what must humans keep?**

- **P1** Precedents live in a few heads
- **P2** No precedent on the table
- **P3** Humans decide — keep it so

RQ1 How can a multimodal AI agent make brand-specific design criteria explicit and open to discussion?

RQ2 What interaction mechanisms help users calibrate trust and retain final decision authority?

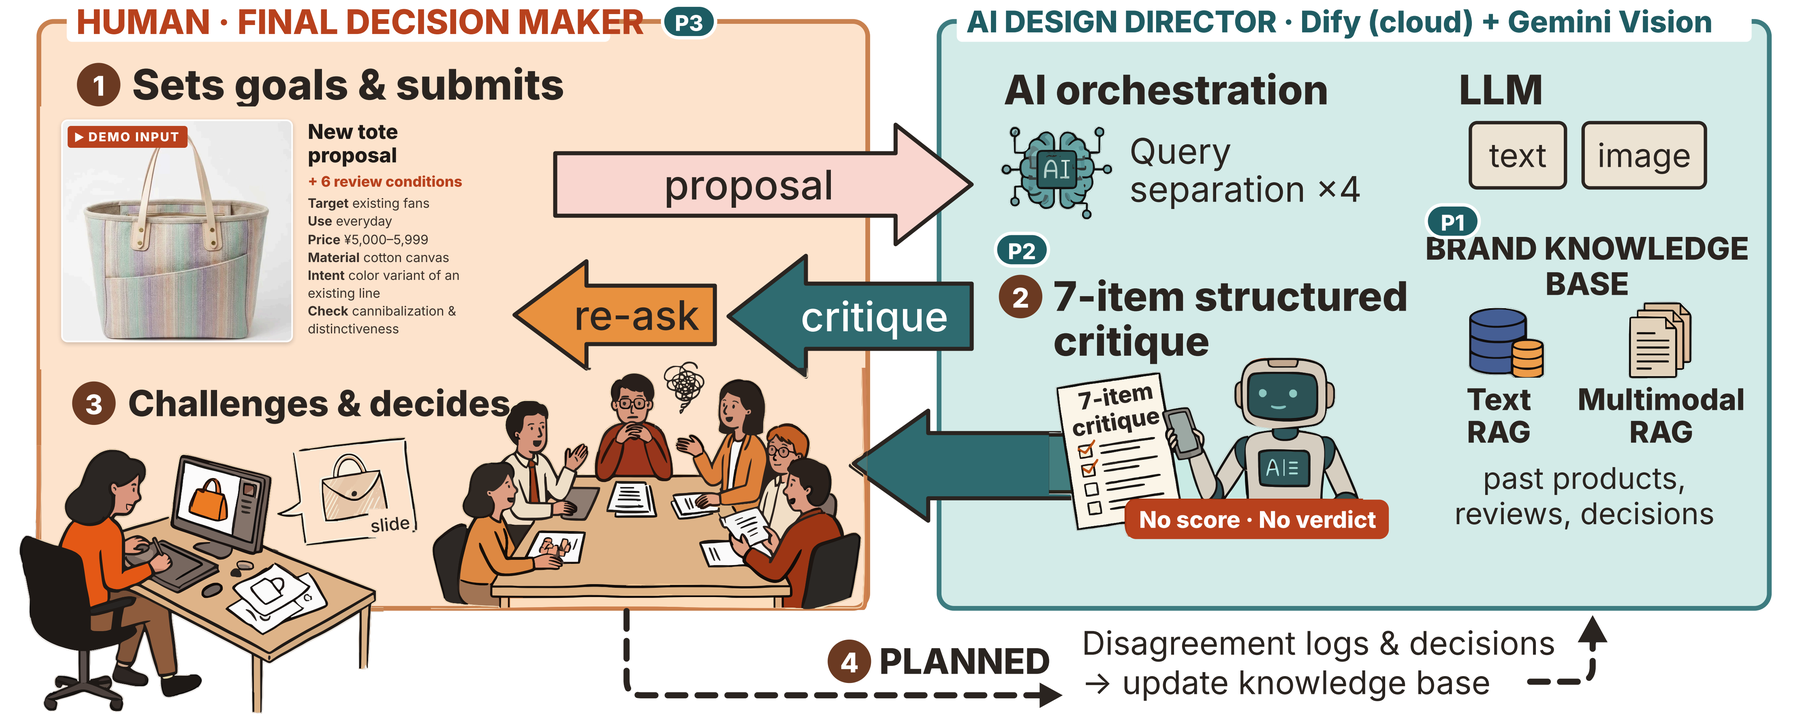

02 WITH THE AI DESIGN DIRECTOR [RQ2]

The AI critiques. Humans decide.

- **P1** → Brand knowledge base
- **P2** → Sourced 7-item critique
- **P3** → Humans question, then decide with a reason

7-ITEM CRITIQUE — NO SCORE, NO PASS / FAIL

1. Summary
2. Brand criteria
3. Alignment & reconsider
4. Strengths
5. Concerns & uncertainties
6. Matters for human judgment
7. Revision options

03 HOW IT CRITIQUES · QUERY DECOMPOSITION [RQ1]

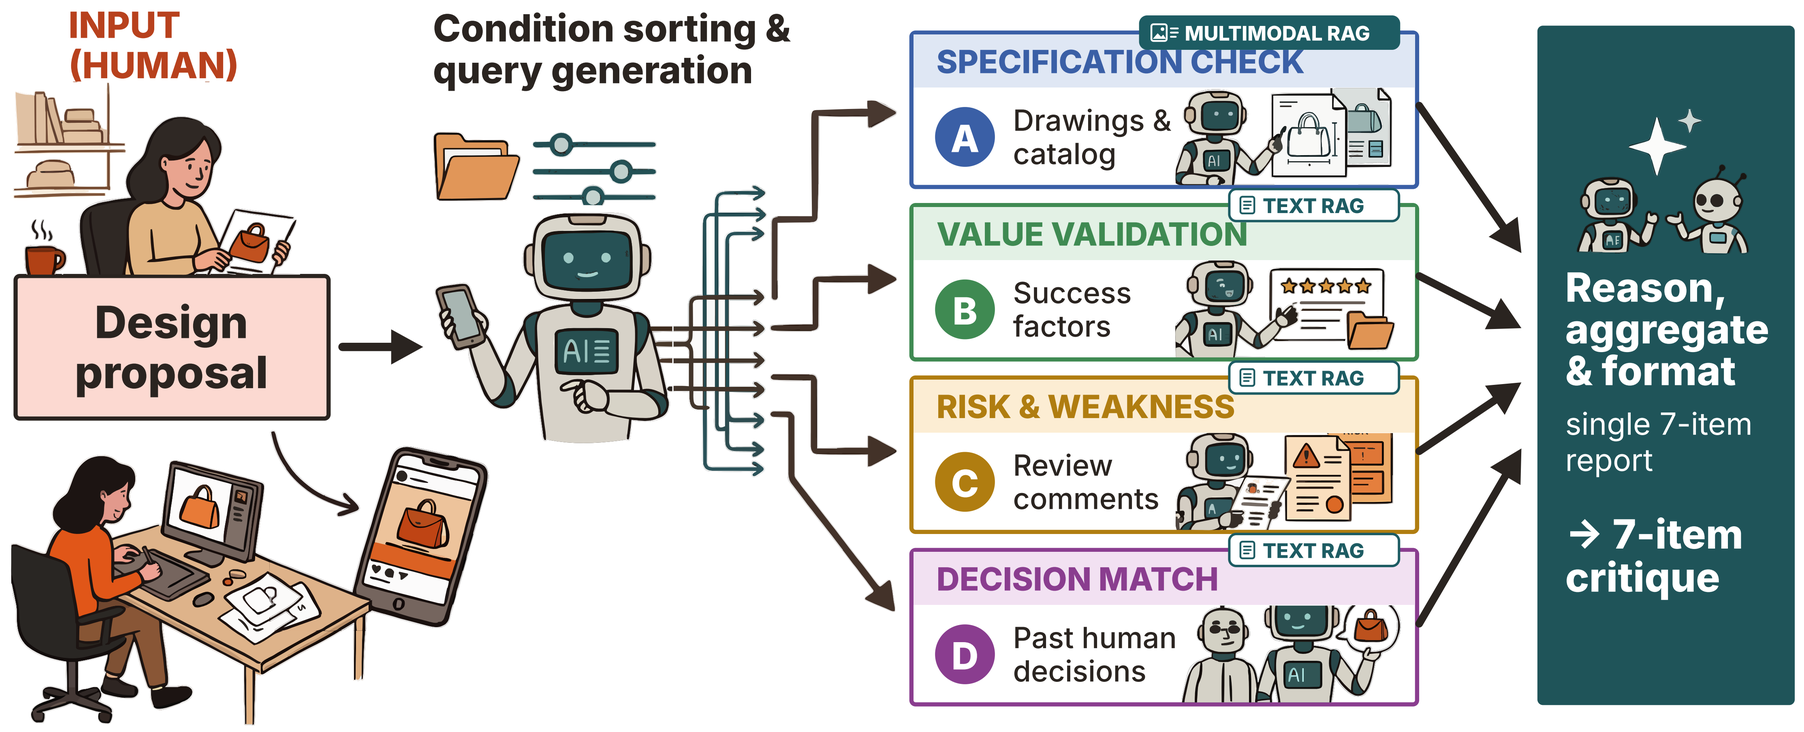

Four questions, searched separately

Input: proposal + 6 conditions
customer · context · price · materials · intent · priorities

DISAGREEMENT IS A SIGNAL

- Ambiguous criteria
- Outdated materials
- Unshared standards
- Creative departure

"Director" is a label, not authority.

04 PLANNED FIELD EVALUATION

Does authority stay human?

8–12 practitioners

A Current method

B AI Design Director

Challenge rate · Anchoring · Disagreement quality · Design convergence

Counterbalanced A/B · questionnaires & interviews under ethics procedures

05 EXPECTED CONTRIBUTIONS

Hypotheses, not findings

Interaction model · **Prototype** · **Evaluation**

Limits: incomplete, past-shaped knowledge · "Director" label may deter challenge · confidential data → external LLM · **Next:** "exploration mode"

TAKE-HOME **The AI critiques with sources; humans keep the decision.**

▶ Demo
1-min video of the prototype
Runs on mock data, not real decisions
